SUMMARY

Software engineer with a focus on building end-to-end web applications. Proven ability to architect RESTful APIs with FastAPI, manage complex PostgreSQL databases, and create premium, responsive user interfaces with React. Experienced in the full development lifecycle, from containerized deployment to real-time data integration.

TECHNICAL SKILLS

Full-Stack: React.js, Python, FastAPI, JavaScript (ES6+), PostgreSQL, Docker

Tools & Deployment: Git/GitHub, Vercel, Render, JWT Auth, Web Scraping (Playwright)

PROJECTS

ClientRadar, Real-Time Lead Detection

FastAPI, React, PostgreSQL, Redis, Docker

- Architected an end-to-end lead generation tool, featuring a custom rule-based web scraper and a high-performance Redis-cached backend.
- Developed a premium glassmorphism dashboard in React to visualize real-time data streams and lead alerts.
- Managed full containerization and deployment pipelines, ensuring high availability and seamless connectivity between services.

WorkFlow, Employee Management SaaS

FastAPI, React, PostgreSQL, SQLAlchemy, Docker

- Built a robust multi-tenant SaaS platform featuring role-based access control and an interactive admin dashboard for KPI tracking.
- Engineered a comprehensive REST API to handle complex database relationships and real-time messaging workflows.

ImohMarket, Automotive Marketplace

Python, FastAPI, JavaScript, PostgreSQL

- Designed a mobile-responsive automotive marketplace featuring secure JWT authentication and dynamic search/filter functionality.

EXPERIENCE

Freelance Full-Stack Developer

2023-Present | Remote / Nigeria

Stackryo

- Delivered end-to-end applications across eCommerce, SaaS, and internal tooling.
- Owned the complete development lifecycle, including API design, database modelling, frontend development, containerization, and deployment.
- Successfully executed a self-directed learning roadmap progressing from frontend and backend fundamentals to databases, authentication, and DevOps through shipped products.

EDUCATION

Self-Directed Software Engineering Programme

- Completed a rigorous, project-driven curriculum where every theoretical concept was directly applied through live, deployed applications.
